

August Update

How to Flourish in Drought

August has arrived, and Santa Clara County is in extreme drought. As gardeners, as landscapers, as business owners, we have an obligation to be an example to others when it comes to water conservation and educated environmental choices; at the same time, we want to keep our landscapes looking fresh and beautiful. We have dedicated this newsletter to bringing you the latest information about how to make the best - and most beautiful - choices to conserve our precious resources in San Jose and beyond.

At the nursery, we are bringing in new stock every day, from novel succulents, to new staked Abutilon, to bright red Echinacea - check out Nursery News below (and [our Instagram](#)) for updates! We are especially focusing on drought tolerant and native plants this time of year; stocks are expanding every day, but demand is high! Get your orders in early.

Finally, we wanted to give a shoutout to some of our favorite people: August also means that school is starting again, and some of our employees will be leaving us. We are so grateful to have had their positive, hardworking energies grace our nursery! They will be missed, and we wish them lots of luck at school.

Enjoy the remainder of your Summer, be safe, and as always, please let us know how we can be of help to you and your business!

Thank you,

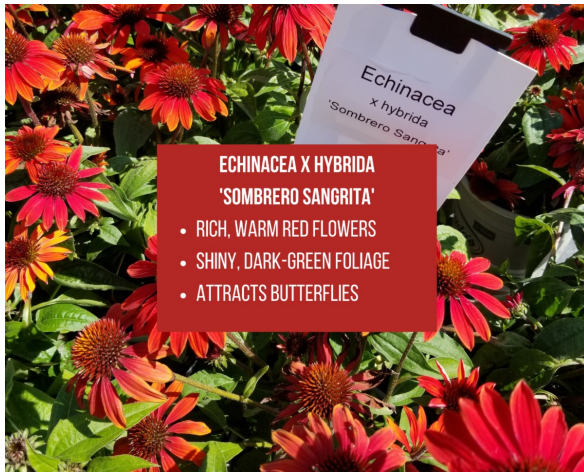

Jane

FEATURED PLANTS:

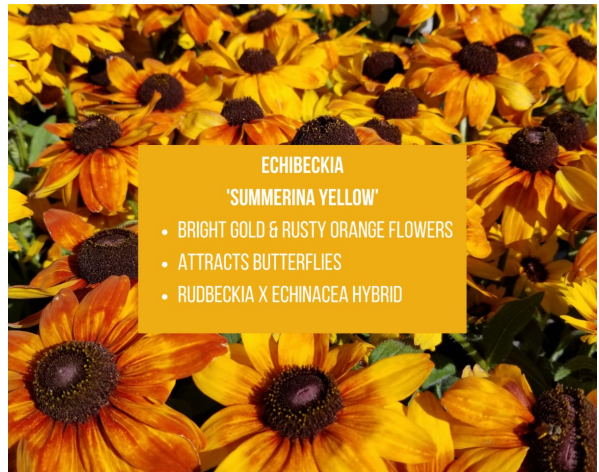

A DROUGHT-TOLERANT RAINBOW FOR YOUR GARDEN

CAPITOLWHOLESALENURSERY.NET

**ECHINACEA X HYBRIDA
'SOMBRERO SANGRITA'**

- RICH, WARM RED FLOWERS

Garden & Landscaping

DROUGHT

how you can help

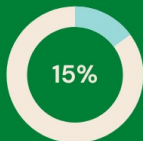

Governor Newsom has declared a State of Emergency in Santa Clara County due to Extreme Drought.

What does that mean for you and your garden or landscape? What can you do to help?

number of people who say that water supply and drought are the most important environmental issue facing California

minimum amount that Governor Newsom has asked Californians to reduce their water usage

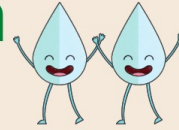

billions of dollars dedicated to water emergency programs and solutions in the Governor's \$100 billion budget

In Extreme Drought, water is inadequate for agriculture, wildlife, and urban needs; reservoirs are extremely low; hydropower is restricted.
